WEB DESIGN & SERVICE AGREEMENT

Zandyr Meakin Graphics • Professional Service Document

This Professional Services Agreement (the "Agreement") is executed and made effective as of June 17, 2026, by and between Zandyr Meakin Graphics, located in Rochester, New York (hereinafter referred to as the "Designer"), and AA Fencing LLC, a registered commercial entity represented by its authorized partner, Aaron Reese (hereinafter referred to as the "Client").

1. SCOPE OF WORK AND DELIVERABLES

The Designer agrees to develop, execute, and deliver a custom structural single-page web asset framework. The operational scope includes semantic structure configuration, mobile interface responsiveness, native touch component optimization, contextual tracking elements, and basic organic indexing foundations. Structural modifications, design layout adjustments, and text updates remain continuous and unrestricted within the local staging environment up until the precise instance the production stack transitions to the final live domain environment.

2. FINANCIAL COMPENSATION AND CAPITAL ALLOCATION

The baseline cost for one-time development, design labor, and programming is established at a flat sum of $900.00. The continuous platform package consisting of server asset deployment, custom domain mapping support, and monthly organic technical check routines is established at a flat recurring schedule of $200.00 per year.

The Client has elected to settle all operational balances in full immediately upon execution. A single transaction covering 100% of the baseline development cost and the initial 12-month hosting term has been securely processed, leaving a net outstanding balance of $0.00 due to the Designer.

Service Description Summary	**Total Cost**
Custom Web Design & Performance Infrastructure Engineering	$900.00
Annual Maintenance, Core Container Hosting & SEO Package (12-Month Block)	$200.00
Gross Capital Commitment	**$1,100.00**
Total Capital Received / Account Marked Paid in Full	**-$1,100.00**

Service Description Summary	Total Cost
Remaining Outstanding Balance Due	**$0.00**

3. ASSET PORTABILITY AND SOURCE CODE OWNERSHIP RIGHTS

The Client obtains complete, uninhibited source file ownership, copyright clearance, and structural code access immediately upon full execution of this document. If the Client makes a determination to adjust corporate operations, shift staging environments, or manage active frameworks elsewhere, the Client commands an absolute right to package, harvest, download, or relocate the underlying script stacks to any alternative third-party host of their choosing without any additional exit penalties or system restrictions from the Designer.

4. NON-REFUNDABLE HOSTING SERVICE TERMS

The system fee of $200.00 functions as a flat commitment protecting active hosting allocations and routine file updates for an immutable 12-month period. If the Client opts to migrate the code structure or point domain routes to another service provider before the active tracking year naturally concludes, server structures will be deactivated immediately. No partial distributions or prorated returns will be issued for any unused calendar blocks remaining in the billing lifecycle.

5. AGREEMENT TERMINATION STANDARDS

Either participating party holds the right to terminate production loops preceding live launch via structured text confirmation notes. Because the total operational balance has been paid in full, any mid-build termination executed by the Client ensures that all design hours logged and assets generated up to that explicit calendar date will be calculated against the upfront payment parameter to cover the Designer's workspace resource utilization.

IN WITNESS WHEREOF, the parties hereto execute this Web Design & Service Agreement under full understanding of all operational boundaries and terms outlined above.
